I&M Industrials, Inc.

10 Akron Drive

Greenville, SC 29604

To: Mr. Brett Easterling

I would like to let you know how completely satisfied I am with the compressed air project that we worked together on here at EZ-GO. As a result of the project, we have accomplished the following:

- Reduced total operating cost of compressed air by \$111,300 annually.
- Stabilized pressure in plant. We were fluctuating by 19 PSI and we now hold +/- 1.5 PSI consistently.
- Provide reliable, dry air to plant with no more moisture issues.
- Reduced the number of compressors we run from 5 to 2 compressors. We turned off 450 HP worth of compressors and we now have built in backup compressors!
- The system controller has completely automated our compressed air system and the energy we consume with the compressed air system matches the demand we have in the plant.

I appreciate the opportunity to work with I&M Industrials on this project and would recommend you and your company to anyone that is serious about saving energy and adding stability, not just to their compressed air system, but to their manufacturing process.

Sincerely,

A handwritten signature in purple ink, appearing to read 'Robert P. Burton'.
