To Whom It May Concern:

As a long-time customer of I&M Industrials, we have had exceptional service in getting material in a timely manner for our processes. We use Ashcroft gauges, Sarco steam products, Norgren regulators, Jabsco pumps, Dwyer gauges and Asco solenoids which we can always get within a day or two notice.

Our sales representative, Tom Carter, has been an asset to Honeywell and BASF in helping with various equipment upgrades. Recently, Honeywell completed an upgrade from Slack & Parr OEM solenoids to Asco Joucomatic solenoids. With Mr. Carter's help in replacing the OEM solenoids, we have had no solenoid failures in the last seven (7) months.

Thanks for all the help I&M has given us and we hope to continue with this partnership in the future.

Sincerely,

Ted Patterson
Electrical Maintenance Planner
